

Braden Air-RF Door

The Braden Air-RF door provides easy open and closing operation because the Air-RF does not use standard copper contact fingers. The Braden Air-RF utilizes an inflatable gasket wrapped with a woven mesh. The Braden Air-RF is supplied with a 120V air compressor. A pneumatic toggle switch operates the RF seal mechanism.

Shielding Effectiveness:

E-Field - Greater than 100db in the frequency range of 10MHz to 150MHz.

Plane Wave - Greater than 100db in the frequency range of 10MHz to 150MHz

Simple and Efficient!
